Introduction

Overview

Cafe 21CS Cashiering
System
a web-based application.

Purpose

Streamlines daily sales
transactions and enhances
operational efficiency.

Technology

PHP (backend),
MySQL (database),
HTML, CSS, JS, Bootstrap
(frontend).

Problem Statement

Challenges in Manual Transactions

- Errors
- Inefficient
- Delays in fast-paced environments

Solution Goal

A Cashiering System that's:

- Automated
- User-Friendly
- Provides Accuracy & Ease of Use

Project Objectives

Key Goals

- Efficient Recording and Management of Sales
- Role based access for secure data handling
- User-friendly interface with Bootstrap & AdminLTE
- Daily sales reports and printable receipts

Tools & Languages Used

Backend

PHP for server-side logic.

Database

MySQL for data storage and management.

Frontend

Flowchart

System Working

- Authentication with role based access

System Working

- Sales Transactions:
Quick entry and receipt printing.

The screenshot displays the 'New Sale' interface of the 'Cafe ZHC Coffee Shop Cashiering System - Admin'. The interface includes a sidebar with navigation icons, a top header with the system name and user 'Johnny Smith', and a main content area. The main area features a 'Client Full Name' field with 'Guest' entered, a grid of product buttons (Banana Milkshake, Caramel Milkshake, Chocolate Milkshake, Cold Brew, Iced Coffee, Iced Latte, Oreo Milkshake, Strawberry Milkshake, and Vanilla Milkshake), and a summary section on the right. The summary section shows a 'Total' of 0.00, 'Tendered' and 'Change' fields set to 0, and a 'Type' dropdown menu currently set to 'Cash'.

Qty	Product	Total

Total: 0.00

Tendered: 0

Change: 0

Type: Cash

System Working

- Reporting: Daily sales insights

The screenshot displays the 'Daily Sales Report' interface of the Z1CS Coffee Shop Cashiering System. The interface includes a sidebar with navigation options: Dashboard, Create Sale, Sales, and Daily Sales Report. The main content area features a 'Filter' section with a 'Date' dropdown set to '03/11/2024', and buttons for 'Filter' and 'Print'. Below the filter is a table with columns: #, Date Updated, Sales Code, Customer, User, and Amount. The table lists three sales transactions and a total row.

#	Date Updated	Sales Code	Customer	User	Amount
1	Nov 03, 2024 18:31	202411030006	Carrie	Johnny Smith	720.00
2	Nov 03, 2024 19:00	202411030005	Kamal	Johnny Smith	485.00
3	Nov 03, 2024 18:40	202411030003	Bob	Johnny Smith	370.00
Total					1,575
